DETAILED ACTION

Application Status

1. By virtue of a preliminary amendment filed on 09/02/2004, claims 1-60 have been canceled; and claims 61-82 has been amended. Thus, claims 61-82 are pending in this instant case.

Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 66, 76, 78, 80 and 82, drawn to a method of using a model of a nuclear hormone receptor having Appendix 3, classified in class 703, subclass 11.
- II. Claims 66, 76, 78, 80 and 82, drawn to a method of using a model of a nuclear hormone receptor having Appendix 4, classified in class 703, subclass 11.
- III. Claims 66, 76, 78, 80 and 82, drawn to a method of using a model of a nuclear hormone receptor having Appendix 5, classified in class 703, subclass 11.
- IV. Claims 66, 76, 78, 80 and 82, drawn to a method of using a model of a nuclear hormone receptor having Appendix 6, classified in class 703, subclass 11.

Art Unit: 1656

- V. Claims 66, 76, 78, 80 and 82, drawn to a method of using a model of a nuclear hormone receptor having Appendix 7, classified in class 703, subclass 11.
- VI. Claims 66, 76, 78, 80 and 82, drawn to a method of using a model of a nuclear hormone receptor having Appendix 8, classified in class 703, subclass 11.

Claims 61-65, 67-75, 77, 79 and 81 link(s) Group I and Group VI. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 66, 76, 78, 80 and 82.

Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104. Claims that require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim(s) including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional

statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The inventions are distinct, each from the other because of the following reasons:

Groups I-VI are related by the virtue of protein crystal coordinates of nuclear hormone receptor. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, Groups I-VI are mutually exclusive, are not obvious variants because each Appendix represents molecules of protein and ligand with distinct positions in space by it's distinct coordinate set. Each coordinate set represents a unique spatial arrangement of a nuclear protein and thus they are not capable of use together.

Because these inventions are distinct for the reasons given above, because the inventions have acquired a separate status in the art as shown by their different search required for any one Group is not required for the other Group as each Group requires a different non-patent literature search using different keywords due to each Group comprising different products and/or method steps, restriction for examination purposes as indicated is proper.

Election

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
